• bhushan.rc@gmail.com • +91 8668943050 • Wakad, Pune – 411057

PROFESSIONAL SUMMARY

Accomplished C++ (11,14,17) Developer and Product/Module Lead with 18+ years of progressive experience in exchange connectivity, live market data, OMS/RMS, portfolio and risk platforms, options analytics, and HFT/low-latency systems. Experienced in leading engineering teams, architecture and design, performance optimization, R&D, code quality, and full software development lifecycle ownership. Proven delivery impact includes up to 70% latency reduction, 60% throughput improvement, and development of multithreaded systems that materially reduced simulation and data-processing time.

TECHNICAL SKILL SET

Languages & Core:	C, C++, Modern C++ (11/14/17), Data Structures, Algorithm Design & Optimization, Multithreading, Concurrency Control, Refactoring, Performance Tuning
AI & AI-Assisted Development:	LLM-Powered Tools (ChatGPT, Claude/Cloude Code, GitHub Copilot, OpenAI Codex, Cursor), Prompt Engineering, AI-Assisted Coding, Code Analysis, Debugging and Refactoring
Systems & Networking:	TCP/IP, UDP Socket Programming, REST API, Web API, Inter-Process Communication (IPC), Plugins, API Integration, Cross-Platform (Windows/Linux)
Domain Expertise:	Financial Markets, Multiple Exchange Connectivity (NSE, BSE, MCX, DGCX, CME), Live Market Data Feeds, Order/Risk Management System (OMS/RMS), HFT, Low-Latency Algo Trading Systems
Tools & Build Systems:	Visual Studio 2019, VS Code, Qt Creator, MFC 2006, Git, SVN, CMake, QMake, Debuggers (GDB, Valgrind)
Databases & Delivery:	Oracle, MySQL, PostgreSQL, SQLite | Agile/Scrum, CI/CD Pipelines, Unit Testing, Test-Driven Development (TDD)

PROFESSIONAL EXPERIENCE

GREEKSOFT TECHNOLOGIES PRIVATE LIMITED | Pune & Mumbai, India

Product / Module Lead – Software Development **2024 – Present**

- **Product & Team Leadership:** Lead cross-functional engineering teams across multiple high-priority product initiatives focused on user experience, trading-risk reduction, platform stability, and profitability.
- **R&D & Legacy Optimization:** Drive continuous R&D and architectural refactoring of legacy C++ codebases, significantly elevating engineering efficiency and system maintainability.
- **Process Delivery:** Established modern Agile development workflows and code-review guidelines, reducing resource overhead while accelerating feature delivery.
- **Mentorship & Culture:** Foster a high-performance team culture through technical guidance, regular code reviews, and performance recognition.

Senior Team Leader — 2017 – 2024

- **Engineering Team Leadership:** Led a team of 9 C++ developers delivering full-cycle solutions using modern C++ (11/14/17), Visual Studio 2019, Qt Creator, and VS Code across Windows and Linux platforms.
- **Low-Latency Exchange Connectivity:** Architected end-to-end exchange connectivity, inter-module communications, and live market-data feeds for global exchanges including NSE, BSE, MCX, DGCX, and CME.
- **Algorithmic Trading Platforms:** Architected and deployed high-performance algorithmic trading engines, including Advanced Options Strategy and Scalping Arbitrage System.
- **Backend Microservices & Risk:** Engineered high-concurrency backend services for Options Analysis, Strategy Finder, Options Position Builder, Portfolio Analysis, and Real-Time Risk Analysis.
- **API & Chart Server Infrastructure:** Designed a high-throughput Chart Manager Server storing OHLC/Tick/Chart data and streaming optimized result sets via REST/Web APIs for web and mobile applications.
- **Legacy Code Modernization:** Spearheaded legacy UI/UX modernization by migrating MFC 2006 modules to Visual Studio 2019, markedly reducing technical debt and improving runtime stability.

Team Leader — 2013 – 2017

- **Module & Strategy Delivery:** Managed 6 developers across end-to-end design and development of high-performance modules including Pair Trading, ETF Algo Trading, Slice Order Trading, and Market Making engines.
- **Derivatives Strategy Engine:** Built dynamic multi-leg options strategy execution modules including Box Strategy, Options Spread, Triangle, Butterfly, and automated Dynamic Delta Hedging.
- **Portfolio & Risk Systems:** Developed a comprehensive Greek Portfolio Analysis and Management System with real-time risk calculations and historical position tracking across multi-asset segments.

Senior Software Developer & Software Developer — 2008 – 2013

- **Core Development:** Developed essential trading platform components using C/C++ and MFC on Windows, QT Creator on Linux. Built key Arbitrage Tracker and multiple strategies including Cash-to-Future, Future-to-Future, IV-Based Trading, Spread IV Trading with Hedging).
- **Market Streaming & Infrastructure:** Developed multi-threaded Live Broadcast System for real-time market data streaming and integrated Greek Value calculations in Dynamic Market Watch across NSE, BSE, and Currency segments.
- **Security & Licensing:** Engineered a centralized enterprise License Manager controlling multi-product usage and internal software authorization.

AWARDS & LEADERSHIP HIGHLIGHTS

- **Greek Star Award (2019):** Honored for 10+ years of outstanding technical contribution, dedication, and impactful product delivery at Greeksoft Technologies.
- **Greek Star Award (2016):** Recognized for exceptional performance in productive engineering leadership and team management.
- **Team Development:** Built and mentored high-performing engineering teams grounded in ownership, clean code principles, low-latency performance optimization, and continuous learning.

EDUCATION

M.Sc. in Computer Science — P.E.S. Modern College, Pune (Pune University) | 2008*
B.Sc. in Computer Science — M.S.G. College, Malegaon, Nasik (Pune University) | 2006
